## SUMMARY

- **13 years of experience** building scalable enterprise applications, microservices, and mobile apps, with a proven track record in **0 to 1** product development.
- **Led cross-functional teams** to deliver multiple production features, while taking ownership of application security, performance, and system observability.
- **Spearheading GenAI integrations** (LLMs, RAG, MCP) to power automated, context-aware workflows and enterprise product ecosystems.
- **Adept at leading agile teams**, driving AI-assisted development adoption, and elevating system observability and code quality standards.

## EXPERIENCE

### Sr Product Developer

Aug 2024 - Present

BMC Software

Pune

- Building the core GenAI platform to power automated AI capabilities and context-aware workflows across BMC's enterprise product ecosystem.
- Integrating LLMs, RAG, and MCP into scalable ecosystems designed to support multiple enterprise product lines.
- Driving the adoption of AI-assisted development workflows in the team to accelerate delivery speed and elevate internal code quality standards.
- Optimizing system observability and driving vulnerability management to ensure a highly resilient and secure architecture.

### Senior Consultant

Nov 2021 - Aug 2024

Thoughtworks

Pune

- Worked on a high-availability revenue management platform using Spring framework & Angular, which optimizes hotel room rates & bookings for global hotel chains.
- Engineered a high-performance decision engine with Spring Boot & DMN for real-time insurance claim fraud evaluation, achieving sub-second response times.
- Implemented an ecommerce web app with React & Spring Boot, for a heavy machinery manufacturer company where customers can search, view details & purchase machine parts.
- Led design and delivery for 10+ features in the retail loyalty mobile app using React Native, AWS Lambda. Addressed complex legal & business requirements with detailed system design. Boosted Play Store rating for the app from 2.2 to 4.6. Addressed multiple tech debts, reducing app crash rate by 10X and AWS costs by 10+%.
- Implemented a retail banking web app & mobile app for an Indian bank with React, React Native & GoLang. Enhanced the app's initial login performance by over 50% with preemptive caching in backend using Kafka & Redis.

### Senior Consultant

May 2019 - Nov 2021

Coffee Beans Consulting

Bangalore

- Contributed to product inception and implemented a recruitment portal with React, aiming to provide 3X recruiter productivity, and reduce hiring time.
- Transitioned from developing internal startup products to consulting on large-scale enterprise projects via Thoughtworks from Nov 2019 till Nov 2021.

### Data Engineer

Jul 2016 - May 2019

GE Healthcare

Bangalore

- Worked on Big Data platform, Full Stack Web App & Firmware in research facility of GE Healthcare.
- Spearheaded data platform's inner source framework & automated data parser implementation with Apache Spark, Python & Jenkins, which reduced release SLA period by around 50% and automated 80% of data processing.
- Implemented a DICOM viewer for headless system, which increased developer productivity in the image reconstruction engine.

### Systems Engineer

Mar 2012 - Nov 2014

TCS

Pune

- Started as a Desktop app UI developer & implemented multiple features. Also built generic UI components which were used by 50+ UI developers. Transitioned into Java development to expand backend capabilities.

## SKILLS & STRENGTHS

**SYSTEM DESIGN** Microservices, Serverless, Micro-frontends, Event driven architecture

**BACKEND** FastAPI, Spring boot, Node.js, AWS Lambda, RESTful APIs, Observability, SQL, Redis

**FRONTEND** Angular, React, React Native, Cross platform mobile apps

**GENAI** LLM, Prompt Engineering, RAG, MCP, Vector DB

**DEVOPS** CI/CD, Docker, Kubernetes, Jenkins

**LANGUAGES** Python, Java, JavaScript, TypeScript, Go

**OTHERS** AI-Assisted development, AWS, Unit testing, TDD, Pair programming, Git

## EDUCATION

### Doctor of Philosophy

Indian Institute of Information Technology, Pune

Jan 2026 - Present

### Master of Technology (Software Engg)

VJTI, University of Mumbai

Aug 2014 - Aug 2016

### Bachelor of Engineering (Computer Engg)

Pune university

Aug 2007 - Aug 2011

## RESEARCH

### Privacy-Preserving Systems

Jan 2026 - Present

Doctoral Research

IIIT, Pune

- Engineering privacy-preserving system architectures that guarantee automated technical compliance with rapidly evolving global data privacy laws.
- Establishing secure boundaries and retrieval safeguards to lower the risk of unintentional data exposure.
