SUMMARY

- **13 years of experience** building scalable enterprise applications, microservices, and mobile apps, with a proven track record in **0 to 1** product development.
- **Led cross-functional teams** to deliver multiple production features, while taking ownership of application security, performance, and system observability.
- **Spearheading GenAI integrations** (LLMs, RAG, MCP) to power automated, context-aware workflows and enterprise product ecosystems.
- **Adept at leading agile teams**, driving AI-assisted development adoption, and elevating system observability and code quality standards.

EXPERIENCE

Sr Product Developer

BMC Software — Aug 2024 - Oct 2026 — Pune

- Powered automated, context-aware workflows by engineering core GenAI platform capabilities with seamless **multi-LLM, RAG, and MCP integrations**.
- Upgraded and optimized the **embedding generation pipeline** for internal & Knowledge Hub documents, enabling scalable document ingestion, vector storage, and retrieval to support **RAG workflows**.
- Engineered a secure **Microsoft Teams Bot** integration exposing an **air-gapped AI Assistant** for real-time querying and user feedback across personal and group chats.
- Accelerated team delivery speed by **20%+** with elevated code quality by driving AI-assisted development adoption.
- Hardened microservices through proactive CVE/SAST vulnerability remediations and OpenTelemetry observability.

Senior Consultant

Thoughtworks — Nov 2021 - Aug 2024 — Pune

- Worked on a high-availability revenue management platform using Spring framework & Angular, which optimizes hotel room rates & bookings for global hotel chains.
- Engineered a high-performance decision engine with Spring Boot & DMN for real-time insurance claim fraud evaluation, achieving **sub-second response times**.
- Implemented an ecommerce web app with React & Spring Boot, for a heavy machinery manufacturer company where customers can search, view details & purchase machine parts.
- Led design and delivery for 10+ features in the retail loyalty mobile app using React Native, AWS Lambda. Addressed complex legal & business requirements with detailed system design. Boosted Play Store rating for the app from **2.2 to 4.6**. Addressed multiple tech debts, reducing app crash rate by **10X** and AWS costs by **10+%**.
- Implemented a retail banking web app & mobile app for an Indian bank with React, React Native & GoLang. Enhanced the app's initial login performance by **over 50%** with preemptive caching in backend using Kafka & Redis.

Senior Consultant

Coffee Beans Consulting — May 2019 - Nov 2021 — Bangalore

- Contributed to product inception and implemented a recruitment portal with React, achieving **reduced hiring time** with **3X recruiter productivity**.
- Consulted on large-scale enterprise projects via Thoughtworks (Nov 2019 - Nov 2021), successfully transitioning from internal startup product development to enterprise delivery.

Data Engineer

GE Healthcare — Jul 2016 - May 2019 — Bangalore

- Worked on Big Data platform, Full Stack Web App & Firmware in research facility of GE Healthcare.
- Spearheaded data platform's inner source framework & automated data parser implementation with Apache Spark, Python & Jenkins, which reduced release SLA period by **around 50%** and **automated 80%** of data processing.
- Implemented a DICOM viewer for headless system, which increased developer productivity in the image reconstruction engine.

Systems Engineer

TCS — Mar 2012 - Nov 2014 — Pune

- Built generic UI components adopted by **50+ developers** and transitioned into Java development to expand backend application capabilities.

SKILLS & STRENGTHS

SYSTEM DESIGN Microservices, Serverless, Micro-frontends, Event driven architecture

GENAI LLM, Prompt Engineering, RAG, MCP, Vector DB

BACKEND FastAPI, Spring boot, Node.js, AWS Lambda, RESTful APIs, Observability, SQL, Redis

FRONTEND Angular, React, React Native, Cross platform mobile apps

DEVOPS CI/CD, Docker, Kubernetes, Jenkins

LANGUAGES Python, Java, JavaScript, TypeScript, Go

OTHERS AI-Assisted development, AWS, Pair programming

EDUCATION

Doctor of Philosophy

Indian Institute of Information Technology, Pune

Jan 2026 - Present

Master of Technology (Software Engg)

VJTI, University of Mumbai

Aug 2014 - Aug 2016

Bachelor of Engineering (Computer Engg)

Pune university

Aug 2007 - Aug 2011

RESEARCH

Privacy-Preserving Systems

Doctoral Research — Jan 2026 - Present — IIIT, Pune

- Engineering privacy-preserving system architectures that guarantee automated technical compliance with rapidly evolving global data privacy laws.
- Establishing secure boundaries and retrieval safeguards to lower the risk of unintentional data exposure.
